In addition to [Fucoidan AF Premium](#), Fucoidan Kenkodo also handles ultra-low molecular weight mozuku extract fucoidan (hereinafter referred to as ultra-low molecular fucoidan) as an authorized agent.

We often ask customers about the differences between these two products, so I would like to talk about the results of comparing the content of ingredients and the analysis report of the Japan Food Analysis Center.

Difference between ultra-small molecule Koidan and fucoidan AF premium

6 big differences

Fucoidan component amount, fucoidan raw material purity, other useful components, amino acid amount, manufacturing plant, product information disclosure, etc.

If you continue to support your health, it's important to know what it is.

1 Fucoidan content

Compare fucose for the most fair comparison

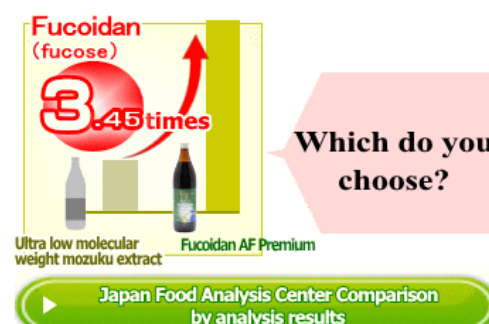

Fucoidan extracted from Mozuku can produce true health power with fucose, sulfate group and glucuronic acid connected.

Fucoidan AF Premium has a fucose content of 3.45 times that of ultra-low molecular fucoidan.

(Compare same amount of liquid)

It is a fair and impartial comparison value as it is compared with the analysis report of the Japan Food Analysis Center, which is a third-party organization.

If you want to choose a product that contains a lot of fucoidan, you need a product that contains a lot of this fucose.

2 Fucoidan purity

Good quality depends on raw material purity

Fucoidan AF Premium fucoidan is made from Okinawa mozuku. Its purification purity is high quality of over 85%.

※Low molecular fucoidan has no description of purity.

This high degree of purity is an important point in producing the power of fucoidan..

Many people don't know, but the higher the purity, the better the quality.

3 Fucoxanthin combination

Plus what you can expect synergistic power

<Fucoxanthin>

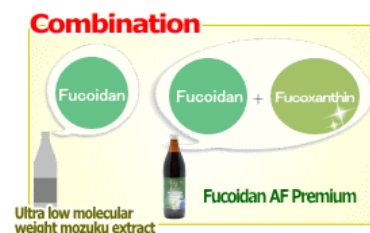

Fucoidin AF Premium contains fucoxanthin.

Fucoxanthin is said to have the same health power as fucoidan, and is a component that is being researched as a carotenoid.

The amount that can be extracted from seaweed is small, and therefore it is an expensive and valuable ingredient.

Since fucoxanthin is naturally soluble in oil, it is difficult to dissolve in water. However, the fucoxanthin contained in the fucoidan AF Premium liquid is the first water-soluble fucoxanthin developed in Japan to dissolve in water.

By taking it at the same time as fucoidan, each other's power will be further exerted, so mutual power can be expected.

<Ascophyllan>

Fucoidan AF Premium contains Ascophyllan, a noteworthy ingredient.

Ascophyllan is a component extracted from the seaweed Ascophyllum nodosum.

て人々の健康をまもるなど、医師とはことなる観点から健康をまもるお手伝いをします。

フコイダン健康堂 LOHAS株式会社

〒816-0801 福岡県春日市春日原東町2-8-1

TEL 0120-251-334 (9:00~21:00)

LOHAS株式会社は「福岡県子育て応援宣言企業」です。
福岡県 第16号

Ascophyllan has a structural formula different from that of fucoidan derived from Mozuku.

It is also excellent in nutrition, and compared to kelp, it is an excellent seaweed that has twice the calcium, five times the iron content, and more than twice the vitamin A.

It is the **first product in the industry** that contains **three useful components of seaweed: fucoidan, fucoxanthin, and Ascophyllan**, and has a golden balance that is more promising for supporting health.

4 Ascofilum combination

Essential amino acids for building a strong body

Fucoidan AF Premium contains plenty of **amino acids essential for the body**. Now that I want to firmly support my health, it contains a lot of ingredients.

It contains **1.8 times** more essential components than the low molecular weight fucoidan, such as amino acids and vitamin B6.

5 Amino acid content

Does it meet safety standards?

If you drink it every day, it is important to be safe and secure.

Fucoidan AF Premium Liquid is a product manufactured in a safe and secure factory certified by International Standard ISO (International Organization for Standardization).

Only raw materials that have passed the strict inspection are used.

Manufacturing plant

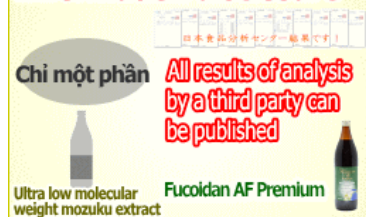

6 Manufacturing plant

Choose a reliable product

The quality test report of raw materials and the content of raw materials used in Fucoidan AF Premium are disclosed to the purchaser.
